JEREMIAH E. BENIGNO

AI SYSTEMS INTEGRATION | BUSINESS PROCESS AUTOMATION | CLOUD DEPLOYMENT

Quezon City, Philippines | +63 968 542 4283 | benignojeremiah@gmail.com | linkedin.com/in/jeremiah-benigno-94359a323

PROFESSIONAL SUMMARY

Operations & Systems Assistant with hands-on ownership of business automation design, implementation, testing, and maintenance. Builds Make.com workflows connecting CRM, email, AI, and productivity platforms; integrates and deploys Python-based AI systems using OpenAI APIs, Docker, and DigitalOcean. Experienced in Google Workspace administration and production troubleshooting.

PROFESSIONAL EXPERIENCE

Operations & Systems Assistant | Ideal Ignite | May 2026 - Present

- Independently designed, built, tested, and maintained Make.com scenarios integrating HubSpot CRM, ClickUp, Gmail, Google Sheets, OpenAI, and WordPress; configured a WhatsApp Business Cloud integration scenario.
- Built end-to-end lead workflows: captured website inquiries, standardized HubSpot data, routed records through Make.com, and generated mapped sales tasks in ClickUp.
- Developed AI-assisted email classification and logging workflows, including Gmail labeling, structured data extraction, Google Sheets records, direct email links, and duplicate prevention; extended classification to an additional workflow.
- Created automated executive email digests and scheduled reporting; configured and monitored integration scenarios, investigated failed runs, and refined workflow reliability.
- Configured CRM custom properties, lead sources, service categories, deal stages, and pipelines; administered Google Workspace security, email settings, and DNS/MX troubleshooting.
- Authored operational SOPs for IT support, onboarding/offboarding, access handling, asset recovery, and business-system processes.

IT Project Manager Intern | Highly Succeed Inc. | Feb 2024 - Jun 2024

- Tracked project milestones and SDLC tasks in Jira; supported capacity planning, sprint reporting, schedules, and stakeholder documentation.

IT Service Desk Analyst Intern | Reed Elsevier | Oct 2023 - Feb 2024

- Supported Active Directory user access, shared mailboxes, and distribution lists; triaged ServiceNow incidents and wrote Tier 1 knowledge articles.

SELECTED TECHNICAL PROJECTS

AI-Powered Executive Assistant & Business Automation Platform | Internal AI Automation Project

- Owned configuration, integration, debugging, and cloud deployment of a Python/Telegram AI assistant using OpenAI Chat Completions and function calling, with calendar, task, news, daily quote, and marketing workflow components.
- Integrated Google Calendar/Tasks OAuth 2.0 and SQLite persistence; managed Docker Compose deployment on DigitalOcean Ubuntu, SSH-based operations, and production incident resolution.
- Configured news intake via Google News RSS and HTTPX, including filtering and deduplication logic; worked with scheduling, daily digest, reminder, and media-handling modules.

Business Process Automation & Executive Reporting | Make.com / HubSpot / OpenAI / Google Workspace

- Solely designed and delivered lead-routing, AI email classification and logging, and executive summary automation; also configured additional email and marketing-assignment scenarios.

TECHNICAL SKILLS

Automation & CRM: Make.com, HubSpot CRM, ClickUp, WordPress, WhatsApp Business Cloud, Gmail, Google Sheets
AI & Development: Python, OpenAI API, Telegram Bot API, Google Calendar API, Google Tasks API, OAuth 2.0, HTTPX, Google News RSS, SQLite
